

## "KazNU - GREEN CAMPUS"

**Project goal:**

Development of KazNU as an environmentally oriented university

**Main events:**

- development of eco-volunteering, creation of eco-posts and student “green” teams,
- organization of separate waste collection and delivery of raw materials for recycling,
- introduction of a rational attitude towards the use of energy and biological resources,
- preparation of scientific papers and implementation of student environmental initiatives,
- use of eco-transport outside the student campus (university bus, bicycles).

The following activities were carried out as part of the project:

5/10/2023

"ISSUES OF THE UNIVERSITY'S TRANSITION TO THE GREEN CAMPUS"

A meeting was held with the Department of Artificial Intelligence and Big Data and the Department of Thermal Physics of the KazWaste company on the topic "Problems of the University's transition to a Green Campus". 🌱

✦ At the meeting, reports were defended on environmental issues at the university, a smart container based on IoT.

Department of Artificial Intelligence and Big Data

**«GREEN CAMPUS» – THE NEW SYMBOL OF FRIENDSHIP**

First-year students of the Faculty of History, Archeology and Ethnology, together with faculty members in the framework of the KazNU Green Campus project, planted flowers on the territory of campus, thereby implementing one of the best initiatives of the university.

20/12/2023

Discussion in Zoom as part of the project «GREEN CAMPUS»

Within the framework of the project "Green Campus", senior teachers of the department of Foreign languages Akylova G.S. and Duysenbaeva Sh.S held a meeting of the "English time" club on the topic "Green Campus".

The 1st year students of the faculty of Information technologies took part in the meeting. Students made reports with a presentation, which covered the topics: the project "KazNU - Green Campus"; the center of "green" technologies; the project "green" energy; the work of an energy efficient greenhouse; the artificial ecosystem "Aquaponics"; the winter garden and revealed 9 ways to promote sustainability in the "Green Campus" of KazNU.

In the conclusion, the participants were shown a video that provides an overview of a number of practices of foreign universities applied in universities to improve campuses and encourage participation in sustainable development.

**Environmental cleanup within the framework of the project «Green Campus»**

On October 15, the volunteers of the Kazakh National University of "Komek" dedicated their weekend to cleaning. The clean-up day at Kaznu was held within the framework of the environmental project "Clean Campus-2023", which is held annually. Great mood, in an unusual atmosphere we worked together, clenching our fists. Let's not forget to start cleaning ourselves to live in a clean world!
